RESEARCH

The Saudi Legal Corpus. Sole author and maintainer of an open, machine-readable corpus of Saudi law joining two bodies of material at the level of the article: 15,855 verified legislative articles across 290 instruments, and 50,666 judgments published in full text by the Ministry of Justice, of which 15,383 carry the appellate decision in the same record. A citator links them through 113,052 statutory citations, each matched to the article cited and carrying the segment of the judgment it sits in, whether the court or a party is speaking, and whether that judgment survived appeal.

- Archived on Zenodo, concept DOI 10.5281/zenodo.22019182.
- Every figure in every manuscript below is computed by deposited code from deposited data and typeset from a generated file; checks refuse to build a manuscript that types a figure by hand, to use a result older than the code that produced it, or to let a note drift from the analysis.

MANUSCRIPTS UNDER REVIEW

- *The Saudi Legal Corpus for AI: An Auditable, Official-Source-Grounded, Article-Level Corpus of Saudi Arabian Legislation.* Language Resources and Evaluation (Springer).
- *Vertical Elaboration or Horizontal Integration? A Citation-Network Analysis of Saudi Arabian Legislation.* Artificial Intelligence and Law (Springer).
- *Can You Build on the Official Record? Availability, Consistency and Provenance in a State's Published Law.* Data & Policy (Cambridge University Press).
- *What Changes, and Where? Legislative Churn Across Saudi Arabian Legislation.* The Theory and Practice of Legislation (Routledge).
- *Ninety-Three Per Cent of a Backlog Is Not a Backlog: Reading a Public Publisher's Own Quality Signal.* Government Information Quarterly (Elsevier), GIQ-D-26-01924.
- *99 Per Cent of the Procedure, 27 Per Cent of the Code: The Enacted Law and the Applied Law in 50,666 Judgments.* Journal of Empirical Legal Studies (Wiley / Cornell Law School), 4582420.
- *Measuring Appellate Reason-Giving in Saudi Commercial Courts.* International Journal for Court Administration (International Association for Court Administration), 912.
- [SUPPLY: The Calendar Gap — exact title and the venue it is under review at]

MANUSCRIPTS COMPLETED

- *How Much Do Statutes Disagree? Measuring Definitional Fragmentation Across a Legal System.*
- *The Code the Courts Do Not Cite: Measuring Uptake After Codification.*

PRESENTATIONS

[SUPPLY: confirm before including] UNESCO Global Forum on the Ethics of Artificial Intelligence (GFEAI 2026), Riyadh, 14–17 September 2026 — poster, at the ICAIRE stand.
